

# OPTIMIZE REVENUE CYCLE OPERATIONS WITH CURRANCE REV-CYCLE YIELD

Partner with Currance for process, technical, and cultural change

---

You know it is there – cash that is just out of reach for your hospital or healthcare organization because of inefficiencies in billing operations and a lack of transparency into your revenue cycle. The traditional methods to isolate inefficiencies and correct revenue cycle operations – conventional reporting that depends on averages and aggregates of data – is useful for generalized conclusions and spotting trends, but does not provide visibility into the root cause of revenue leakage.

The business of healthcare is fluid and constantly adjusting to pressures such as volume changes, payer contract adjustments, labor challenges, and evolving reimbursement models. Continually changing variables create ‘noise’ in the revenue cycle that must be filtered to recognize true operational performance and achieve maximum reimbursement. Revenue cycle management needs a precise instrument of measurement, one that can mitigate the noise in the reimbursement cycle, to isolate and correct workflows that leave money on the table day after day, year after year.

## Leveraging the patented technology of Currance Yield

Currance’s Rev-Cycle Yield (RCY) is the first innovation in healthcare’s revenue cycle key performance benchmarking for decades. RCY measures yield deep (at the account level) and wide (across facilities, payers, departments, and service lines) to precisely measure operational efficiency at specific time intervals, such as 30, 60, and 90 days. Its patented algorithm distills data into its purest form by mitigating the noise in the reimbursement cycle, providing actionable insights with the most accurate measurement of expected cash collections available.

## Reveal performance opportunities

The data-driven root-cause analysis of Currance Rev-Cycle Yield reveals process opportunities for sustained performance improvement. AI-powered insights, workflow, and collaboration tools achieve on average a 4 – 6% sustained annual improvement on expected net revenue with a 7 – 11% acceleration in cash collections, all while reducing operational costs.

# Currance technology and expertise

Empower your organization to achieve exceptional revenue results

## Unique professional services and support

Currance's top priority is to ensure your organization is recovering every potential dollar at the lowest possible cost. In addition to technology solutions, Currance offers an exclusive suite of professional services and support that provide the tools your organization needs to succeed, when they need them.

*Business Intelligence and Reporting*

**ScoreLogix™**

Simplify decision-making with precise metrics and actionable data

*Workflow Management*

**CollectLogix™**

Optimize workflow efficiency with one touch

*Virtual Workforce Collaboration*

**RemoteLogix™**

Elevate productivity of virtual teams within a secure environment

## Unique professional services and support

Currance's top priority is to ensure your organization is recovering every potential dollar at the lowest possible cost. In addition to technology solutions, Currance offers an exclusive suite of professional services and support that provide the tools your organization needs to succeed, when they need them.

*High-performance Team Building*

**PROFESSIONAL DEVELOPMENT**

A blended approach of skills and leadership training that optimizes Yield methodology

*Labor Productivity Solution*

**FLEX WORKFORCE**

Scalable, dedicated resources to supplement your workforce on-demand

*Workforce Training and Certification*

**TEAM ENGAGEMENT PROGRAMS**

Enhance the employee experience with targeted Yield methodology and technology training
