

# RemoteLogix™

Optimize Rev-Cycle Yield with a Dedicated Management Platform

RemoteLogix™ is your control center for Rev-Cycle Yield management. All the tools your team requires – from proprietary Currance solutions such as ScoreLogix™ and CollectLogix™ to third-party applications – are contained in one virtual office environment. Our patented technology delivers next-generation infrastructure that connects remote workers with each other and the systems they need while providing managers full visibility into workforce productivity and effectiveness.

## Created by Rev-Cycle professionals for Rev-Cycle teams

Healthcare revenue management has unique challenges that can be difficult for those outside the industry to understand. The seasoned Rev-Cycle professionals at Currance have aggregated their real-world experience to ensure you can access all the intelligence and tools your team requires from a secure, central location.

## Integration with Currance systems and third-party applications

Currance understands that some organizations may already be using remote workforce productivity tools for managing activities such as team chats, learning management, file sharing, and task time tracking. RemoteLogix™ is designed to integrate with applications already in use as well as offer its own workforce management solutions such as:

- **Client Portal: Single virtual office environment**
- **InfoHub: Integrated LMS system providing online training and SOP library**
- **CollabApp: Team communication application with video, text, and chat functionality**

## The engine of high-performing remote revenue cycle teams

Our commitment to the remote and work-from-home business model has helped us create innovative technology that delivers unrivaled quality, flexibility, and transparency.

### RemoteLogix™ Features

- **Fully hosted virtual desktop**
- **Customized portal landing page**
- **Ease-of-use layout**
- **Single Sign On capability**
- **Multi-level security – HIPAA, HITECH, PCI**
- **Focused design to keep teams on-task**
- **Workforce analytics and productivity reporting**

### Optimize labor with insights into productivity, quality, activity

In addition to simplifying and organizing Rev-Cycle operations, RemoteLogix™ gathers data from all aspects of the virtual desktop to create Team and Individual Scorecards – the industry’s most comprehensive report of individual and team productivity.

### Scorecards measure individual performance in three categories:

- **Productivity – Know how many accounts your associates are working on each day**
- **Quality – Understand which associates are the most effective at overturning denials, collecting the highest percentages of net balances, and which associates have the highest write-off rates**
- **Activity – Monitor the time associates spend on tasks such as productive web activity, calls per day, activity in the host system/EHR, and idle time**

### Redefine Rev-Cycle success with Currance

The Currance suite of Rev-Cycle technology provides the advantages of patented Rev-Cycle Yield methodology, workflows, and insights to drive better overall performance and recognize real opportunities in the revenue cycle.

Contact us today at [sales@currance.com](mailto:sales@currance.com) to see how RemoteLogix™ and Scorecards can redefine your organization’s definition of success and create a culture of building upon sustainable improvements to boost net revenue collections.
